

The City of Rockwall, herein called the City, authorizes \_\_\_\_\_, herein called the Permittee, to remove and replace the paving listed in this permit.

1. The Permittee agrees to comply with the City's current Standards for Design and Construction.
2. All construction materials shall be subject to inspection by the City's Engineering Construction Inspector listed below.
3. The Permittee shall contact the City's Inspector at least twenty-four (24) hours prior to beginning work on this authorized permit.
4. The Permittee shall contact the City's Inspector at least twenty-four (24) hours for inspections.
5. The Permittee shall hold harmless the City and dully appointed agents and employees against any action for personal injury or property damage sustained by reason of the exercise of this permit.
6. This permit will be null and void if not constructed within six (6) months from the issuance date of this permit.
7. Approved permit must be kept onsite at all times while under construction or inspection.
8. All fill requires 95% compaction with densities. Densities may be required based on existing subgrade conditions if deficiencies are noticed after paving has been removed.
9. Concrete test cylinders will be required on all pours 10 yards or more. Pours less than 10 yards may require test cylinders as required by the Engineering Inspector. Permittee shall contact the Engineering Inspector for this determination prior to start of construction.
10. Mix design must be verified prior to concrete placement.
11. All lab results are to be emailed to the City Inspector.
12. 6" flexbase will be required for subgrade for all public street repairs.
